

Global Reliability

LPG Dispensing Systems

Capitalize on the reliability only a Global dispenser can provide.

Pre-set keypad with easy-touch buttons for ease-of-use and long-term durability.

Easy-to-read, backlit LCD display for no-fail visibility.

At Kraus Global, we are proud to offer robust and reliable LPG dispensing systems for the international market.

In an industry where up-time is a key factor in revenues, Kraus Global Liquefied Petroleum Gas (LPG) dispensers are providing peace of mind to station owners around the world. Designed by certified engineers and built with the latest technological innovations, Kraus LPG dispensers provide a safe and reliable dispensing solution for even the most demanding site conditions. And, because they are designed with the familiar look and feel of a standard gasoline dispenser, they offer a dispensing experience customers love. Contact us to find out how to get the reliability of a Kraus Global dispenser working at your station today.

LPG Dispensing Systems

Kraus
GLOBAL
INC.

Description

Kraus Liquefied Petroleum Gas (LPG) dispensers have long been the leaders of the LPG refueling industry, offering safe and quick filling in a high quality, reliable dispensing unit.

KRP Series dispensers incorporate the latest technological innovations to offer a superior dispensing system. Available in a wide variety of cabinet styles, Kraus LPG dispensers also offer the familiar look and feel of a standard gasoline refueling dispenser, providing a seamless refueling experience for station visitors.

Internally, Kraus LPG dispensers feature industry-standard Micon electronic control registers and an accurate 4-piston meter. In addition, KRP series dispensers can easily supply the popular options many station owners have come to expect, such as a keyswitch for two-tier pricing, a keypad for pre-set fill amounts, automatic temperature compensation (ATC), and the ability to communicate with most commercial POS or card readers without the need for additional equipment.

Features
